

RELEVANT INFORMATION

Bogotá, D.C., January 9, 2018. Grupo Energía Bogotá (GEB) informs that as a result of the adoption of the new strategy and creation of the three Business Strategic Groups (GENs), Álvaro Villasante and Andrés Baracaldo Sarmiento joined GEB as Low Emission Generation Vice-President and Urban Energy Solutions Vice-President, respectively.

Villasante has a degree in Business Administration and Management from the Universidad de Salamanca, with a Certificate in Corporate Strategic Management of the Universidad del Instituto de Empresa, Master in Human Resources Strategic Management of the same university and international Master in International Trade from ESIC Business and Marketing School.

He has more than 8 years of experience in companies with a focus in development and investment in the renewable energy sector in Latin America and has participated in the different stages of development, investment and financing of generation projects of more than 2000 MW in renewable energy and in the structuring of business plans and analysis of energy markets.

On the other hand, Andres Baracaldo is an Economists from Universidad de los Andes with an MBA from the London Business School.

He was extensive experience in finance matters as well as in the development of businesses for the energy sector, having executed M&A and/or privatization transactions mainly in companies in the energy sector. He has been responsible for the strategy, growth and development of dealings in transmission matters in the largest Companies of the sector.

About Grupo Energía Bogotá

Grupo Energía Bogotá (GEB) formerly EEB, is a joint stock company, listed in the Stock Exchange Market of Colombia, which main corporate purpose is the generation, transmission, distribution and commercialization of energy, gas and liquid fuels in all of their forms.

Currently, Grupo Energía Bogotá is main Multi-Latin electric energy and natural gas company of the region with presence in Colombia, Peru, Guatemala and Brazil. EEB acts like a "strategic connector", focusing in three Business Groups:

- Urban Energy Solutions, which seeks to develop and operate the necessary infrastructure to meet the demand of electric energy and natural gas of large cities;
- Interconnection for Market Development, is a line of business responsible for connecting sources of energy generation with mega consumption centers and large users; and
- Low Emission Generation that seeks new opportunities in renewable energy in countries that are undergoing the transition of the energy matrix to this source of sustainable generation and low emission.
