

RELEVANT INFORMATION

Bogotá, D.C. February 12th, 2021.

Regarding the article published by Valora Analitik on February 12 entitled "GEB and Enel would integrate their operation in a new brand", we specify that the creation of a new brand is not involved in the agreement that has been reached so far.

On the other hand, we reiterate the relevant information published last January 29, 2021, which states that the board of directors meeting of Grupo Energía Bogotá held on January 26, 2021 authorized GEB's Management to sign a new Investment Framework Agreement with Enel Américas S.A., which will regulate their relationship as shareholders of Emgesa S.A. ESP and Codensa S.A. ESP. This agreement will only become effective in the event that certain conditions are met, and the required corporate authorizations are obtained from both parties. This new agreement would allow, among others things, the integration of the renewable business to their joint investments and the adoption of corporate governance rules aligned with the goals and opportunities of this new stage.
