- ▶ The Micaela Bastidas, the first Cálidda 2.0 dining room in Villa El Salvador, was inaugurated. The event had the presence of the President of Perú, the Minister of Development and Social Inclusion and the Minister of Production. In addition, the alliance with was renewed with the "A Comer Pescado" Program, which trains the leaders of these dining rooms in 10 districts (+500 people) on the nutritional value of fish and its preparation. Likewise, the delivery of this product will be made at a social price.
- As part of our commitment to promoting inclusion and gender equality in the sector, Cálidda developed together with the Peruvian Training Institute the course "Construction and commissioning of internal networks of residential, commercial, category IG1 natural gas" aimed exclusively at 50 women.
- During the first week of July, Fitch Ratings ratified Cálidda's rating with a stable outlook.

### **Commercial Performance**

#### Volume

- At the end of Q2 2023, the total invoiced volume increased by 7.8% vs. the previous year, explained by the greater demand of the generating sector due to adverse climatic events and irregular rainy periods, added to the higher consumption of the NGV sector due to the improvement in the competitiveness of natural gas as a result of the increase in the price of substitute hydrocarbons and the greater conversions of vehicles to NGV thanks to the financing granted by the State through of the FISE.
- ✓ Firm contracts reached 568 MMCFD (electric generators: 526 MMCFD + industrial segment: 42 MMCFD), representing 74% of the total invoiced volume.

The invoiced volume breakdown by client segments is shown in the following table:

| Table N° 4 – Invoiced Volume per Client Segment |         |         |         |         |         |        |  |  |  |

- ✓ At the end of Q2 2023, our Independent and Regulated customers consumed on average about 348 MMCFD, equivalent to 83% of our natural gas distribution capacity (Lurín – Ventanilla).
- The volume consumed is greater than the contracted capacity since this is intended to cover the demand of regulated customers.
- ✓ In this sense, at the end of Q2 2023, our Regulated customers consumed 172 MMCFD, equivalent to 78% of the contracted volume of gas and 75% of the contracted transport capacity.

#### **Distribution Network**

- ✓ The length of the Cálidda distribution system reached 16,597 km of underground pipeline in Lima and Callao.
- At the end of Q2 2023, Cálidda built a total of 357 km, a result although lower than the figure of the previous year, is aligned with our investment plan for the period 2022-2026 and the highest level of maturity of the company.

The next table shows the evolution of Calidda's distribution system:

#### **Network Penetration Ratio**

- The network penetration ratio is calculated by dividing the number of connected clients by the number of potential clients that are located in an area close to Calidda's network. This key ratio increased at the end of Q2 2023 to 73% due to the constant growth of number of connected clients.
- Cálidda, according to the plan approved by the regulator, is aimed at low-income districts benefiting from subsidies from the Peruvian State, where the savings generated by the use of natural gas instead of other substitute fuels is more appreciated by residents.

The next table shows the evolution of potential clients, total clients and the penetration ratio:

| Net Debt/EBITDA            | 2.9x    | 3.1x    |        | 3.4x    | 3.2x    | 3.8x  | 3.7x    |  |

- The solid results of 2022, despite the local context, allows us to forecast a stable growth for 2023.
- Regarding the construction of networks, this year we seek to build 1,250 kilometers of networks.
- ✓ In terms of new connections, we seek to make between 215,000 and 230,000 connections, according on the level of investment and target network kilometers.
- ✓ We expect demand to continue its gradual recovery, especially in the NGV sector, and consequently, maintain EBITDA between 220 and 225 MMUSD.
- We expect a slight increase in the Net Debt/EBITDA ratio towards levels of 3.7x and 3.8x due to the financing of our investment plans. Likewise, from 2024 a sustained deleveraging is expected.
